API Onboarding Process

Registration

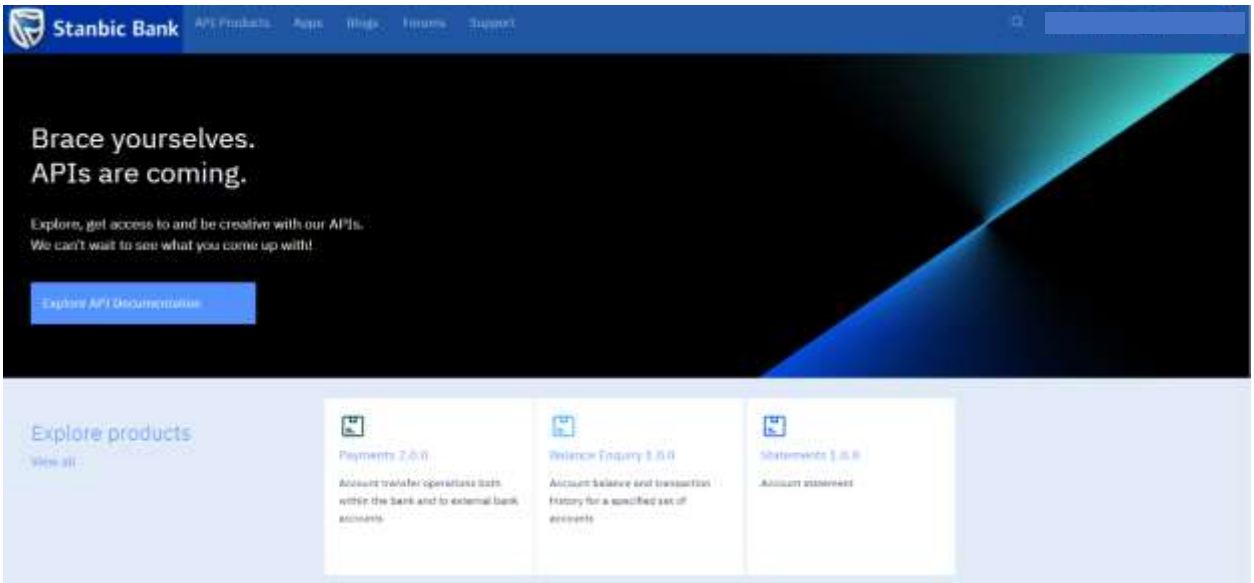
Use this link to register to the Stanbic bank developer portal and submit your details:
https://developer.Apps.Sandbox.Stanbicbank.Co.Ug/pp-providerorg1/external-uat-ug/user/register

Your account will be successfully created but require approval from the Stanbic team. You will receive a confirmation email from apiservices@stanbic.com with further instructions on the email address you provided on signing up

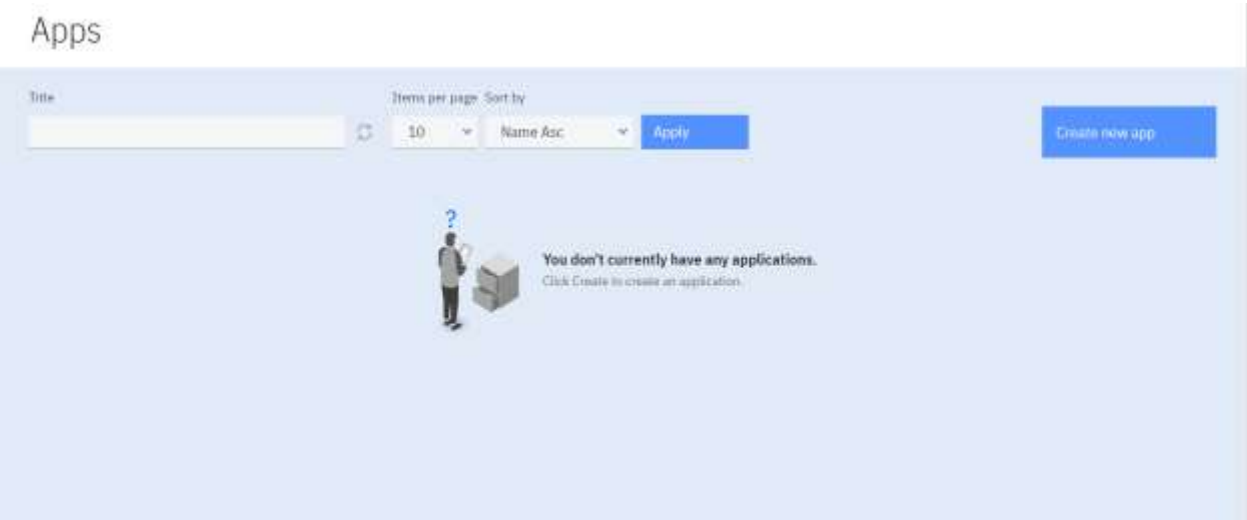
After the admin has approved your account, you will receive an email to complete your registration as such below. On clicking this link, you will be able to access your account through signing in.

Creating Your Application

On sign in, in your homepage looks like the below. Click on Apps on the menu bar to create your app



Click the 'Create new app' button



Application Creation Form Fields

1. **Title**:

This is the name of your app for example 'MyApp'. This value should not contain any spaces

2. **Description**:

This is a description of what your app or business does

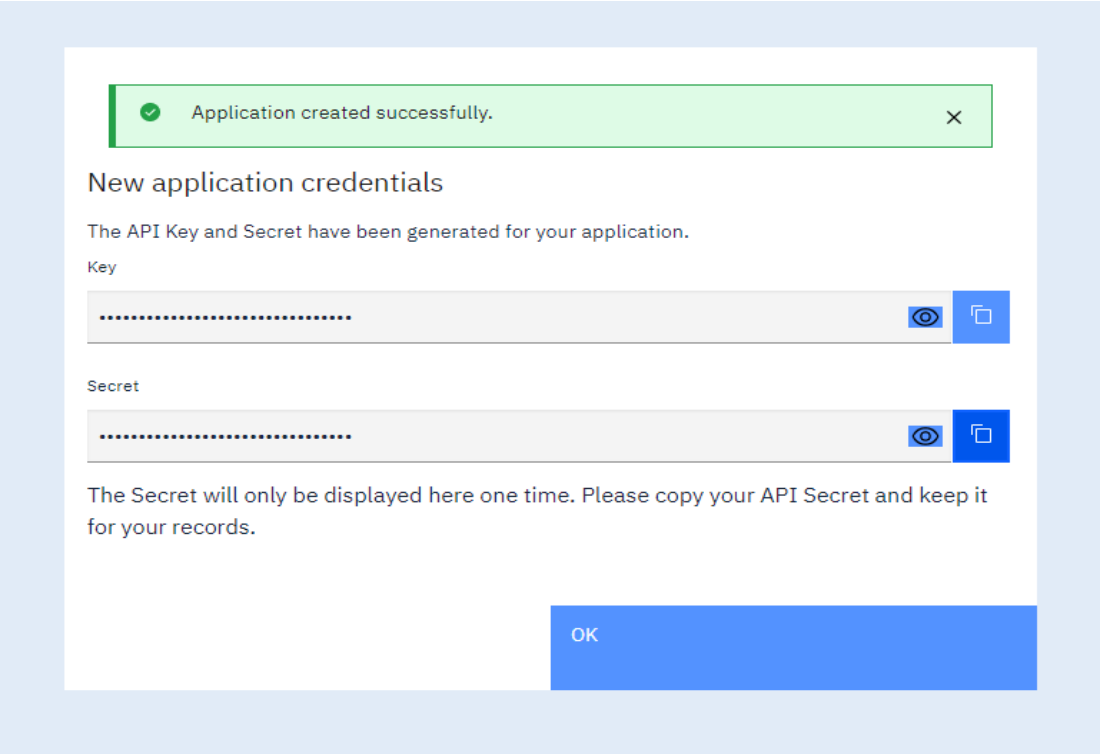
3. **Certificate**:

This certificate is a requirement for data integrity. Please note that:

- This should be a CA signed certificate with the SHA 256 with RSA algorithm
- If you are unable to upload the certificate on the portal, please share this certificate with the Flexipay Technical team for configuration on your app
- You will then be able to sign your requests with the private key. Sample message signing code is shared in the authentication section

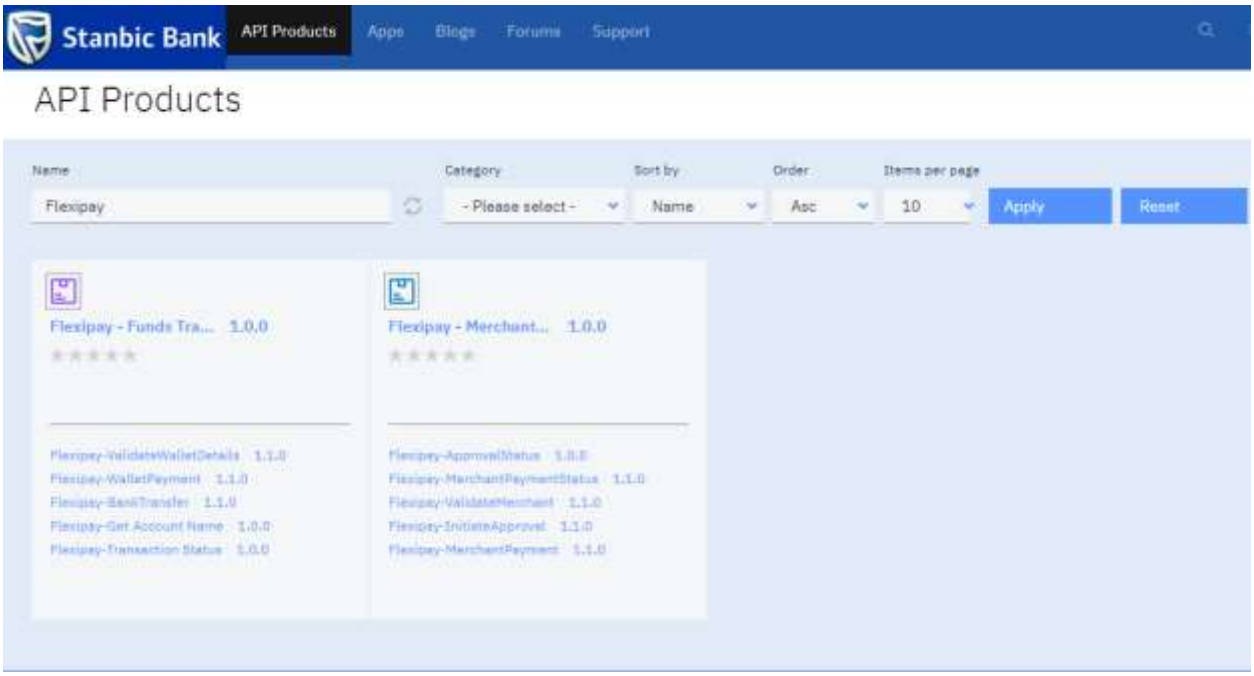
API Credentials Keys

After your application has been created successfully, the API key and API secret will be generated for your app. Please copy them and keep them for your records, then click OK.

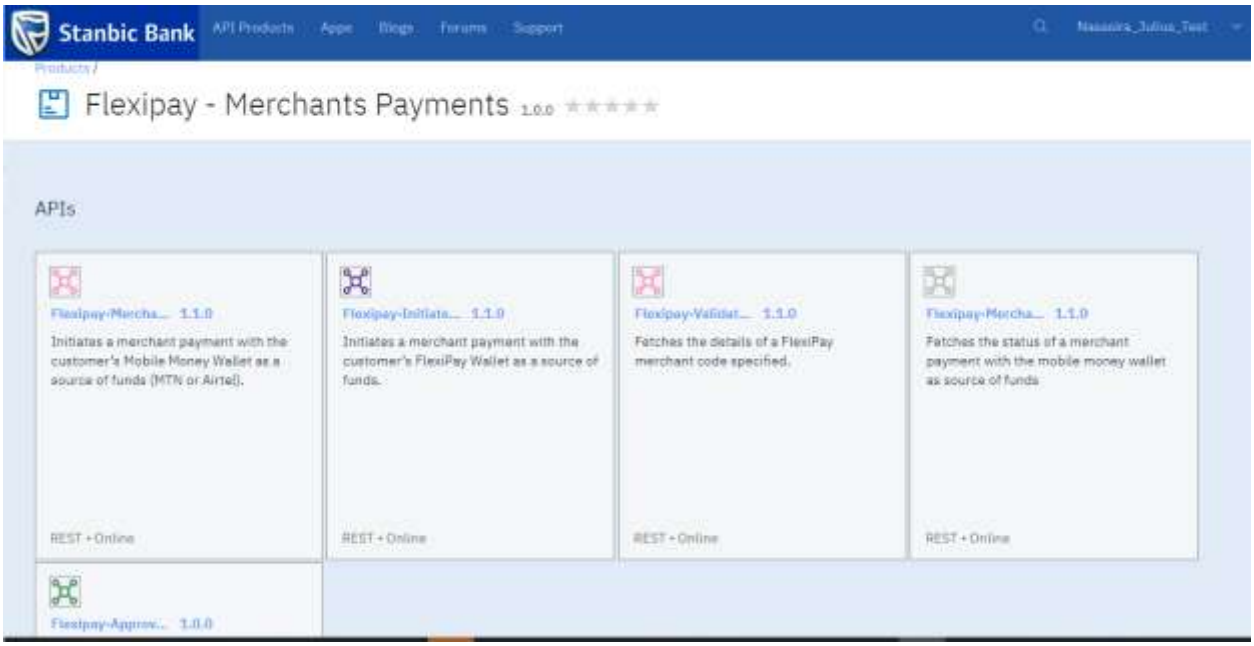


Subscribing to the FlexiPay API

From the API product tab search for the product Flexipay ,Then Choose your preferred Flexipay product e.g. Flexipay – Merchant Payments

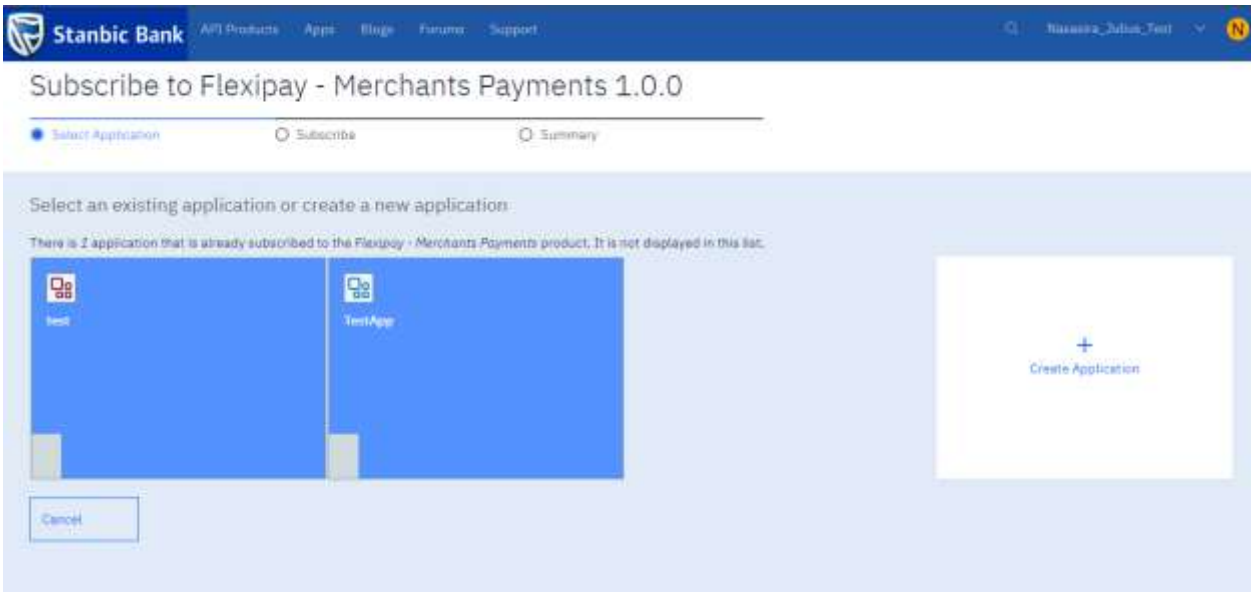


When for example you select FlexiPay - Merchant Payments, scroll down to select a default Plan.

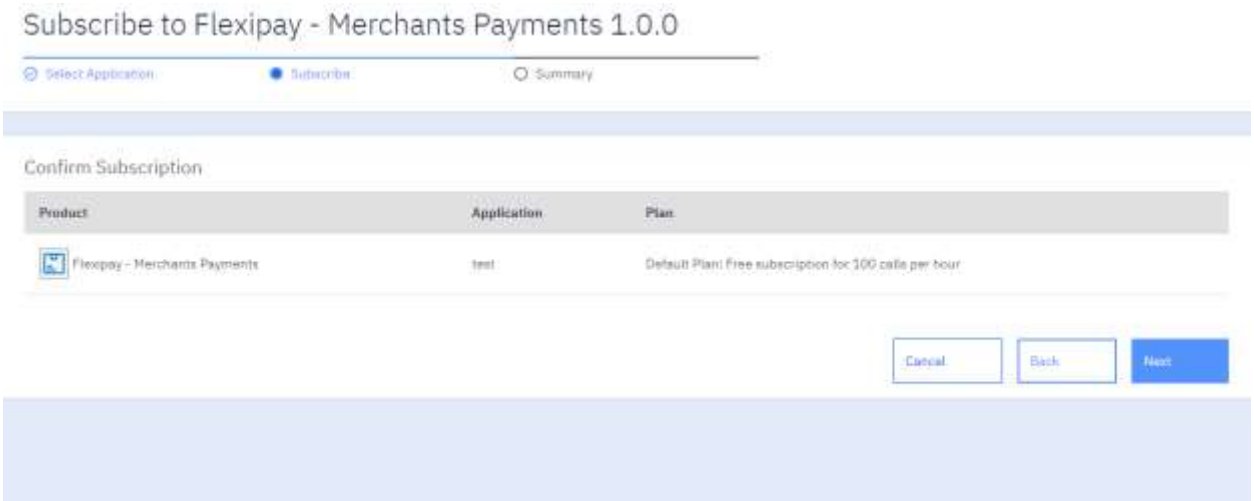


Select the Default Plan

Select your App



To Subscribe to the product, click next then done.



The product you have subscribed will now be Pending Approval. You will receive a confirmation email at your subscription email address. The Flexipay Technical team will have to approve your subscription to the product before you can access it
